# PTEC T-BONE + PRESSURE GAUGE or + PRESSURE SENSOR

How can you be sure about your compressed H2 system's pressure levels? Our PTEC T-Bone + Pressure Gauge and T-Bone + Pressure Sensor components measure pressure twice to give you one reliable overview.

Hydrogen-fueled mobility is evolving fast. Whether you need to catch up, keep pace, or get ahead, we can help. We lead the market with compressed H2 containment solutions for storage, transport, and on-board fueling systems. From hydrogen refueling stations to storage and transport containers, from cars to buses and trucks, our type 1-4 cylinders, cylinder systems, and gas-street components help your sustainable mobility program move full speed ahead.

# Engineered in Germany

Run your hydrogen applications with a precise overview of gas levels using **PTEC T-Bone + Pressure Gauges and PTEC T-Bone + Pressure Sensors**. Our gauge and sensor assemblies give you the confidence you need to run safe, clean, efficient operations.

Durable

Lightweight

Design

Innovation

Long Range

**Tightness:**  $< 5 \times 10^{-6}$  mbar l/s, 20 °C, 100% He

**EC 79 Certification**

All seals designed for **compressed H2**

Reliable in **fueling** and **operation**

**Noiseless**

**Inlet / outlet:** SAE 9/16-18 UNF, other connections on request

**Compact, low-weight design**

**Operating pressure:** 0 - 70 MPa (Pressure gauge up to 35 MPa)

**Operating temperature:** -40 °C - +85 °C

**Burst pressure:** > 105 MPa

**Corrosion-resistant,** stainless steel
